
The Progressive Foundry SDX (SOUNDBANK)

mp3 playing, audio editing or DAW work, the SDX can crank out some serious noise with that little package in its designed-for-both-form-and-function USB/2.0/1.1 port and audio/mic combo connectors. The SDX comes with one independent volume control, and one to tweak the mix, plus built-in mic and line inputs. You can save your settings so you don't have to adjust them each time you use it. Digital audio data is fed into the SDX's mix through a Marantz AVC722 (with preamp), which is more flexible than an integrated .mp3 player and allows you to adjust the volume without the click. However, the SDX's design doesn't permit the Marantz to take on mixing duties. More than just a solid-state CD player, the SDX is also an outstanding reference soundcard with its super-sensitive analog input circuitry. A solid-state power amp produces the digital signal in a digital-to-analog converter and outputs it to the Marantz AVC722 preamp. We've included a custom-designed BNC cable to ensure that the high-resolution digital signal is sent to the DAC. If you're using the SDX for recording, you'll want to use the Marantz AVC722 preamp to deliver a cleaner and more detailed signal to the digital recording format. The SDX has an impressive set of features. It offers real-time volume control, and three levels of equalization, plus more than 40 onboard presets. Let's take a look. Features Here are some of the most interesting features of the SDX: • Uncompressed, 10-bit/192kHz audio data is delivered to the Marantz AVC722. This DAC has its own dedicated volume control and headphone output. • The Marantz AVC722 includes real-time volume control, which means you can keep the SDX volume at the same level as your source volume without affecting your CD. • The SDX has three-level EQ, plus more than 40 onboard presets. You can even mix your own versions of the SDX's presets. The dedicated, user-adjustable volume control takes the guesswork out of adjusting the volume, so you can keep the volume level from changing. Additional Features Additional Features include: • RCA 82157476af
